## EXECUTIVE DIRECTIVE

Disaster Relief Efforts in Texas USA

**BRYSON, TX – 8/30/2017** – Aero-Marine Engineering, Inc.

This Executive Directive is issued to all OEM's of HVAC equipment Nationwide and any subsidiaries, distributors, dealers, and installers. Aero-Marine Engineering, Inc. (AME), wishes to provide assistance to the Disaster Relief Efforts involving the wide-spread destruction by the hurricane "Harvey". Therefore it is issuing this Directive to wave any Premium Time Charges for orders that are marked for the areas affected by "Harvey". Any order received with "Harvey" on the Purchase Order (PO) will automatically receive Premium Time Service (quickest turn-around and service) without additional charge on the order.

This Directive will make sure any orders placed for the affected area will get their protection needs as fast as humanly possible, receive priority status and get the needed HVAC equipment on site the quickest way without additional costs to the end user.

#####

Aero-Marine Engineering, Inc. has been providing anti-corrosion protection in the HVAC industry for over 45 years! AME works with all the OEM's of HVAC equipment to provide a factory applied coating with special anti-corrosion properties. Designed specifically for placement in coastal applications, TechniCoat 10-2 is the first to come with a standard 10 year warranty.
